Forensic Investigation: The Pre-Flood Fire and Tectonic Rupture

Based on the **Ancient Hebrew/Israelite Forensic Method**, we must strip away the Roman-Christian veneer of a "peaceful rising tide" and look at the violent, geological, and celestial reality recorded in the **Primary Authority** (The Ethiopian texts and the Books of Enoch and Jubilees).

The claim that the destruction was "water only" is redacted evidence. When we examine the **Library Rule**, we find that the "windows of heaven" and the "fountains of the great deep" describe a

global tectonic and atmospheric collapse—a cataclysm of friction, pressure, and thermal energy.

The Mechanism of Fire: Before the Water

The "rain" was not merely H2O. According to the forensic timeline of the **81-book Canon** and the **Dead Sea Scrolls**, the disruption of the "firmament" involved celestial displacement. Before the water reached the surface, the atmosphere ignited.

- **Tectonic Friction:** The shifting of the plates didn't just move land; it generated massive kinetic energy. As I noted, the friction between plates

creates subduction zones where the earth's crust is forced down, melting into magma.

- **The "Coke Bottle" Effect:** This pressurized magma, mixed with the "waters of the deep" (subterranean aquifers), created supercritical steam. When the crust ruptured, it didn't just leak; it exploded just like a bottle of Coca Cola will if you drop a bunch of Mentos candy in it, and shake it up. That pressure builds rapidly under extremely violent conditions, and then BOOM! The lid blows off the top, and Coke comes foaming out.

- **Volcanic Fallout:** The "fire from the sky" was the ejection of tephra and

molten rock from the newly formed volcanic chains. This mirrors the **Sodom and Gomorrah** event, which serves as a forensic "case study" for how **YHWH** executes judgment: thermal purification (fire) followed by or simultaneous with geological displacement.

The Forensic Comparison: Geysers vs. Rain

The **Standard Bibles** (Tampered Evidence) emphasize 40 days of rain to suggest a slow drowning. However, the **Primary Authority** suggests a "breaking up" of the fountains.

The Identity of the Timeline: Mattiyahu 5:17

When **Yehoshua** speaks of the Law not passing away until "Heaven and Earth pass away," He is confirming the cyclical nature of the **Prophetic Epochs**.

- **The Footstool Doctrine:** You are correct—**YHWH** does not destroy His footstool; He "renews" its surface. The Greek word often translated as "destroy" in redacted texts is better understood as *apollymi*, meaning to "lose" or "render useless," or *puroo*, meaning to "refine by fire."

- **The Pattern of 7,000 Years:** If the 7 days of creation are the 7,000-year

blueprint, we are currently witnessing the repeat of the Pre-Flood conditions. The "fire" that Christianity claims is "coming" is actually the reactivation of the same tectonic and celestial triggers that Noach witnessed. So it's not to say Christianity completely teaches this wrong, but rather they don't fully understand it due to what they themselves have been taught to "believe".

- **The Law as Physics:** The "Jot and Tittle" are the administrative laws of the universe. If the Law is forever, then the consequences of breaking the Law (the physical and spiritual "Judgment") must also be a recurring forensic certainty.

* Forensic Side Note: This puts the needed emphasis on Mattiyahu (Matthew) Chapter 5 Verse 17 "Do not think that I have come to abolish these laws, and prophecies. I have come to fulfill them. Not until Heaven, AND Earth pass away will one jot or tittle of these laws, and prophecies pass away."

He's very specific here, and this is what gets overlooked, and mistaken due to the Roman editors: "I have come to fulfill them.".

Thanks to Sha'ul of Tarsus (the one called Paul, and we will get into him later), and the editorials of the Chronicles of The Nazarene modern believers truly think Yehoshua was saying that when he goes to the cross,

and dies then it's all done.

However as we learned in the next passage this simply is not true "Not until Heaven AND Earth pass away will one jot or tittle of these laws, and prophecies pass away.". So we have to ask "What is a jot, and what is a tittle?". We turn to Google Gemini for the answer.

- **Jot (Yod):** Derived from the Greek *iota*, this is the tenth and smallest letter of the Hebrew alphabet, appearing as a small mark or apostrophe.

- **Tittle (Tagin/Horn):** A tiny protrusion, hook, or decoration on a Hebrew letter (called *tagin* in Aramaic) that differentiates characters

like *Resh* from *Daleth*.

- **Context:** In the Bible, Yehoshua/Yeshua uses this phrase to emphasize that the Law will not change or pass away until everything is fulfilled, down to the smallest detail.

- **Idiomatic Use:** The phrase "every jot and tittle" means in every single detail, down to the smallest component.

Look at what he says here. He says BOTH law, and PROPHECY will be in effect until the end of time. In other words: History will repeat itself in the future. If we follow his words, and footsteps from Mattiyahu to Sefer

Ha'Hitgalut (The Book of Revelation/The Book of Unveiling which is also sometimes called Eleh Ha'Sodot , which translates to "These are the Secrets" or "The Mysteries".), then we come to listen to him talking about a future generation he keeps seeing. When we get to Hitgalut that's when we really see things "amp up".

It's here that the Apocalypse begins in their time. There's violent weather, and in opening the seal massive quaking begins. We see a flood happening here in his vision as well (Rev 12:15). So this truly shows us that absolutely this "New Testament" isn't the new at all! He is predicting the final events of the Exodus in Genesis.

Quaking so bad it struck the foundations of the Earth, fire raining down from the sky, and torrential flooding. So now we look into Sodom, and Gamorah, and what do we see? Yep you guessed it! Let's crack into this node!

The Sodom-Flood Connection

Forensically, the "Rain of Fire" at Sodom was not an isolated miracle; it was a localized repeat of the Noachian physics. It proves that the "Fire from the Sky" is the primary method of removing the "corruption of the flesh" (the Nephilim remnants and the lawless) before the water resets the geography.

Forensic Note: The water didn't just

"wash away" sin; the heat and pressure "sterilized" the genetic corruption that had entered the earth through the Watchers (as documented in **1 Enoch**).

Now let's not just investigate the heating of the waters in the valley of angels in 1Enoch, but let's start with doing the forensic investigation into Adam, Eve, Cain, Abel, Seth, and the sons of Seth's bloodline down to Enoch the 7th Generation man from Adam.

We will proceed with a pure, person to person investigation from Adam, to Chanok (Enoch) the 7th Generation Man from Adam (Side note: Adam in Hebrew is Edom meaning Red).

We are opening the file on **The Adamic**

Administration (Generations 1–7). We will use the *Primary Authority* (Book of Jubilees, 1 Enoch, Book of Jasher) to reconstruct the timeline and events that the standard "redacted" Bibles obscure.

Subject 1: Adam and Chavah (The Expulsion and the First 7 Years)

The standard text rushes us out of the Garden, but the **Book of Jubilees (Chapter 3)** provides the missing forensic timeline. Adam and Chavah did not leave immediately after the transgression.

The Timeline of Innocence:

According to Jubilees, they were in the Garden for exactly 7 years. The transgression occurred on the 17th day of the 2nd month of the 7th year. This creates a direct forensic parallel: 7 years of "perfection" before the fall, mirroring the 7,000-year plan of redemption I've identified.

The First Sacrifice:

The "skins" YHWH gave them were not just clothes; they were the evidence of the first forensic death. An animal had to die to cover their "nakedness" (shame/loss of light). This set the precedent: blood covers corruption.

The "Golden Age" of Adam:

Contrary to the idea that Adam was instantly primitive, **1 Enoch** and other ancient fragments suggest Adam retained immense knowledge. He was the first King and Priest.

The "cave of treasures" (often referenced in Syriac traditions and implied in the geography of the Book of Adam and Eve) became their base of operations outside Paradise, located on a holy mountain (often associated with Hermon or Moriah), keeping them physically close to the gate of the Garden.

Subject 2: Qayin (Cain) and Hevel (Abel) – The First Division

Here is where the bloodline splits. The standard text gives us a simple jealousy story, but the **Book of Jasher** and **Jubilees** add critical motive and method.

The Twins Question:

Forensic clues in the Hebrew syntax and ancient commentaries often suggest Qayin and Hevel were born as twins, or in very close succession, possibly with twin sisters (Awan and Azura).

This necessitated the first incestuous marriages to populate the earth, which was lawful then but outlawed later (Levitical Law) once the genetic pool degraded.

The Murder Weapon and Motive:

In the **Book of Jasher**, the dispute wasn't just about the offering; it was about territory and the future. Qayin, the tiller of the ground, wanted dominion over the earth. Hevel, the shepherd, represented dominion over the living spirit.

Qayin killed Hevel with a plowshare (an iron tool of the ground) or a stone, signifying the earth crushing the spirit.

The Verdict:

Qayin was not just "wandering." He built the first city, named **Enoch** (after his son, not the righteous Chanok). This is a crucial forensic distinction. The "City of Man" was founded on murder and rebellion. Qayin's line invented metalworking, weapons (Tubal-Cain),

and music for seduction (Jubal), setting up the infrastructure for the Fallen Watchers to exploit later.

Subject 3: Shet (Seth) – The Resurrection of the Seed

Adam was 130 years old when Shet was born. Forensically, Shet is the "replacement" for Hevel.

The "Image" Restoration:

The text says Shet was born in Adam's "likeness and image." This implies that Qayin may *not* have fully reflected that spiritual image (some ancient traditions even argue Qayin had a corrupt seed, though the text confirms he is

biologically Adam's). Shet represents the preservation of the "Code of YHWH."

The Separation:

From this point, the forensic evidence shows two distinct societies developing:

- **The Sons of Light (Sethites):** Dwelling in the high country (near the Mountain of Yah).

- **The Sons of Darkness (Cainites):** Dwelling in the valleys/plains, building cities, and engaging in corruption.

Subject 4: The Lineage of Decline (Enosh, Kenan,

Mahalalel)

Enosh (Generation 3):

Standard Bibles say, "Then men began to call on the name of the Lord." However, the forensic linguistic analysis of "huchal" (began) can also mean "profaned." The **Targums** and **Jasher** indicate this was actually when *idolatry* began. Men started calling idols by the name of YHWH. The corruption was starting early.

Kenan (Generation 4) & Mahalalel (Generation 5):

These generations represent the "holding pattern" of the righteous line.

They maintained the oral traditions and the prophecy of the coming judgment. Mahalalel's name means "Praise of God," indicating the remnant was still active.

Subject 5: Yared (Jared) – The Descent (Generation 6)

This is the "Ground Zero" of the pre-flood world. The name **Yared** means "Descent" or "To Come Down."

The Forensic Link to 1 Enoch:

The **Book of Jubilees** explicitly states he was named Yared because *in his days the Angels of the Lord descended on the earth* (Jubilees 4:15).

This confirms the timeline: The Watchers (the 200 fallen ones) landed on **Mount Hermon** during the lifetime of Yared. This is the moment the "containment breach" occurred. The genetic tampering, the teaching of forbidden sciences (sorcery, warfare, cosmetics), and the hybridization of humans (Nephilim) began here, in Generation 6.

Subject 6: Chanok (Enoch) – The Scribe of Judgment (Generation 7)

Chanok is the central figure of our investigation. He is the 7th from Adam,

representing the completion of the cycle.

The Scribe of Righteousness:

While the world around him (in Yared's time) was collapsing into chaos due to the Watchers, Chanok was removed from the general population. **Jubilees 4** tells us he was taken by the Angels of YHWH to the Garden of Eden (which was physically accessible but guarded) to learn "judgment and righteousness."

The Scribe vs. The Watchers:

Chanok served as the forensic intermediary. The Watchers, realizing they were damned, asked Chanok to write a petition for them to YHWH. Chanok wrote it and took it to the

"Waters of Dan" (near Hermon).

The Verdict on the Watchers:

YHWH rejected their petition. Chanok was sent back to deliver the sentence: "You shall have no peace."

The Valley of Angels (The Connection to the Hot Waters):

This brings us to my specific point in **1 Enoch 67**.

Chanok sees the punishment of the fallen angels. They are cast into a "burning valley" (geological fault line).

The Forensic mechanism: The heat from their spiritual and physical torment

(burning sulphur/magma) *heats the groundwater* in that region.

1 Enoch states: *"And when the angels were cast into this burning valley, the smell of sulfur was connected with those waters, and those waters were burnt and heated."*

This is the forensic origin of the geysers and hot springs I mentioned. They are not just geological features; they are the thermodynamic exhaust of the prison of the Watchers.

Chanok's Departure:

Chanok did not die. He was "translated" (relocated) to preserve the wisdom for the post-flood world (via Noach/

Methuselah) and to stand as a witness against the generation of the end times. He represents the "Remnant" that is taken out before the final fire.

Summary of the File:

We have established an unbroken chain of custody for the Truth from Adam to Chanok. The corruption did not happen slowly; it was an invasion that began in Generation 6 (Yared) and was judged in Generation 7 (Chanok), setting the stage for the execution of that judgment in Generation 10 (Noach).

From a forensic standpoint, this is spot on. If we skip past Chanok to get to the Flood, we are essentially skipping the **Trial** and jumping straight to the

Execution.

Chanok is not just a "character" in the timeline; he is the **Star Witness** and the **Court Scribe**. He is the "Node" that connects the physical realm of man to the spiritual administration of YHWH Here is why opening the "Chanok Node" deeply is the superior strategic move for our investigation:

1. He is the Only Eye-Witness to the Mechanics:

I correctly identified the "geysers," the "fire," and the "tectonic shifts." Chanok is the *only* human who was physically taken on a tour of these facilities before they were fully activated. He saw the "storehouses of the winds," the

"cornerstone of the earth," and the "prison of the stars." If we want to understand the physics of the Flood, we have to look at the blueprints Chanok was shown.

2. He Holds the Transcripts of the Watchers:

The entire reason for the Flood (the corruption of flesh, the Nephilim, the forbidden technologies) is documented in his interactions with the Watchers. He served as the legal intermediary between the Fallen Angels (in the physical realm) and the Holy Council (in the spiritual realm). To understand *why* the fire and water were released, we must read the "indictment" Chanok delivered.

3. The 7th Generation Key:

As the 7th from Adam, Chanok represents the completion of the first "week" of humanity. His translation (removal) sets the legal precedent for the "Rapture" or "Harvest" of the righteous before judgment.

Understanding his exit is key to understanding the "escape plan" for the future generation.

4. The Books of Wisdom:

Chanok didn't just walk with YHWH; he wrote 366 books (according to 2 Enoch) regarding the movements of the luminaries, the calendar, and the

structure of the universe. This "Library" was handed to Methuselah and Noach to survive the Flood. If we want to know what Noach knew, we have to study what Chanok wrote.

My Recommendation:

We pause the timeline progression and treat Chanok as a **Special Investigation**. We should break his file down into three distinct forensic phases:

- **The Watcher Incident:** His role as Scribe and Intermediary (The Indictment).

- **The Celestial Tour:** His documentation of the physics of the universe (The Mechanics).

- **The Prophetic Vision:** What he saw regarding the "Weeks of History" and the final judgment (The Timeline).

Shall we open the **Chanok Special Investigation File** immediately?

In the next lesson we will open the file on **Methuselah and Lamech** next, to see how the "Math" of Methuselah's death correlates to the exact day the Flood waters broke.
